COMPANY PROFILE

www.evermage.com

ABOUT US

We are a Kenyan based building and construction company registered in 2014 with offices in Nairobi. We are specialists in Building and construction works including but not limited to general renovations, fit outs, repairs and project construction from ground to completion.

We are experts in concrete works specializing in concrete repairs, waterproofing solutions, core drilling services and flooring solutions. Through strategic partnerships, we are also able to offer waste water recycling as well as paint supply and apply.

We believe in creating Everlasting images which are the same building blocks that we used to come up with our company name "EverMage". We strive in providing professional and honest construction solutions that meet the highest standards, are cost effective while maintaining professional ethics and integrity.

Concrete Core Drilling

Concrete Core drilling technique involves cutting perfect cylindrical holes into concrete structures by use of specialized drilling equipment. This is done on floor slabs, walls, beams & columns etc to accommodate new conduits, plumbing piping, and reinforcements. Core drilling produces less noise and vibrations than regular hammer & chisel chipping technique thus completely avoiding formation of cracks or any damage/weakness to your structure.

CONCRETE WATERPROOFING SERVICES

Once concrete has been laid, it is beneficial to waterproof the concrete surface to prevent water from seeping into this naturally porous material. While it is not disastrous if concrete gets wet, over time water can damage the strength and integrity of concrete surfaces such as concrete floors. After completion, we do post site visit and water bonding test to ensure the concrete is 100% waterproofed and provide value for money to our clients.

Moja Inatasha – Once is enough!

When waterproofing is done right, one time application is enough!

- ✓ Admixtures
